

Kensly EUGENE

OBJECTIVES

Passionate about IT, cybersecurity, and web development, I aspire to join a dynamic team to contribute to the design, security, and optimization of IT systems and web solutions while enhancing my skills. I am eager to develop innovative and secure applications that improve user experience.

EXPERIENCE

PROJECT MANAGER — HEALTH+

April 2024 - July 2024

- Supervised the design and development of applications enabling the digitization of medical records for hospitals in Haiti.
- Led a multidisciplinary team to create a web solution adaptable to all devices, centralizing document management to improve healthcare facilities' efficiency.
- Delivered strategic presentations to promote the project to stakeholders, highlighting its social and economic impact.

WEB APPLICATION DEVELOPPEMENT

Août 2024 - Septembre 2024

- Developed applications for the inventory management system of LALA Products, including intuitive interfaces to enhance item tracking and internal processes.
- Designed data visualization tools, such as interactive charts, to represent sales performance and key indicators in real-time.
- Integrated advanced search functionalities and interfaces optimized for various platforms (desktop, tablet, mobile, etc.).

PROFESSIONAL INTERESTS

- Web application security
- Security policy design
- CISCO
- Cryptography
